CHAIRMAN'S LETTER

Dear Shareholders,

2006 was a very eventful year both for our company and for Thailand as a whole. Despite difficult market conditions KGI Thailand continued to operate profitably and recorded a net profit for 2006 of Baht 182 million. 2006 was characterized by many significant changes, both expected and unexpected, which were often sudden and dramatic. In this environment KGI's strengths helped to maintain its stability and direction despite often very challenging circumstances.

During 2006 the SET traded between a high of 788 in May and a low of 588 in December. For the year as a whole, the market declined by 4.8% whilst average daily volume was Baht 16.2 billion, a slight decline when compared with the Baht 16.5 billion per day turnover in 2005. KGI's market share was 3.94% and we ranked 7th overall, both of these figures represented improvements over 2005 when our market share was 3.72% and our ranking 8th.

In April 2006 Thailand officially opened its Futures trading market. The opening of this new market was something which KGI had been looking forward to and working towards for some time. Equity market Futures are a central and important part of modern developed equity markets and the opening of a Futures market in Thailand is a sign of its growing maturity and strength as a modern financial center. The company also ranked no.1 in 2006 in terms of market share in the Thailand Futures Exchange (TFEX) market with a market share of 16.53%. We are proud that KGI won the "Best House of the Year 2006", given to the futures brokerage firm with outstanding performance and best service quality, and also won the "Most Active House 2006", given to the futures brokerage firm with the most active futures derivatives business, at the TFEX Best Awards 2006.

In 2007 the futures market, TFEX, will introduce Options trading, adding a further alternative tool for financial market participants. KGI fully supports the continuing development of Thailand's financial markets and continues to work closely with market stakeholders, including regulators, market operators and clients, to ensure the successful expansion of these markets.

Change is central to financial markets and we expect 2007 to continue to reflect this. Some developments in 2007, such as the development and launch of new products like the SET50 Index Options, Derivative Warrant, and Equity Exchange Traded Fund (ETF), can be anticipated in advance, and KGI will prepare for these. Other changes, by their very nature cannot be predicted in advance. However, realizing this, we have developed a resilient and flexible approach and I believe that KGI is well prepared to deal with whatever may happen in the coming year.

KGI Thailand has always been aware of its responsibilities as a good corporate citizen of Thailand. In 2005 the company donated Baht 20 million for disaster relief after the Tsunami hit southern Thailand. In 2006 KGI Thailand, together with our subsidiary 1AM, as a tribute to H.M. the King, sponsored the performance by the Thailand Philharmonic Orchestra of "The Celebration for Maharajah: The Great King of Music". In 2005, the Company's Board of Directors approved the donation of Baht 1 million per year for 3 years to projects sponsored by Her Royal Highness Princess Maha Chakri Sirindhorn's foundation, which focus mainly on education. In the current year we will continue to support the second phase of this Princess's project.

As the new chairman of KGI Thailand I would like to express my thanks, on behalf of all shareholders and employees, to my predecessor, the former Chairman, Mr. Angelo Koo, for all his hard work and dedication to the company over the years. KGI will of course retain its shareholding in KGI Thailand and will remain the major shareholder of the company. I would also like to thank my fellow board members and all of the employees of KGI Thailand for their hard work during the past year. Last but not least, I wish to thank all shareholders for continuing to invest in the company.

Mr. Chin- Lung Tseng
Chairman

AUDIT COMMITTEE REPORT

To All Shareholders

The Board of Directors of KGI Securities (Thailand) Public Company Limited has appointed the Audit Committee which consists of three Independent Directors: Mr. Pisit Leeahtam (as Chairman), Mr. Don Bhasavanich, and Mr. Pradit Sawattananond, and has appointed Ms. Apaporn Vorapun as secretary of the Audit Committee.

In year 2006, the Audit Committee held five meetings to perform its duties as assigned by the Company's Board of Directors and to submit relevant reports. The Audit Committee, together with the Company's management, the auditor, and the Internal Audit Department, had set up various meetings to discuss and exchange ideas about methods of auditing, internal control systems, yearly audit plan, and the evaluation of auditing results. Furthermore, they have continued to follow up major audit concerns, review financial statements and financial reports, and reviewed the Company's business practice as related to relevant regulations and laws. This was done in order to provide a correct and transparent view of the Company for shareholders and all related parties. The Audit Committee had suggested guidelines and advised the Company's Internal Audit and Compliance Department in order to ensure that the Company had good auditing and internal control systems by setting up operating procedures in accordance with the Securities Exchange Commission's and the Stock Exchange of Thailand's rules and regulations and accepted standards

The Audit Committee had reviewed the Company's quarterly, half year, and yearly financial statements for the year 2006 and commented that the Company's financial statements were accurate and that the disclosure in the financial statements was adequate and complete according to general accounting standards. The Audit Committee also considered, selected, and recommended appointment of the Company's auditor and auditing fee Accordingly, the Audit Committee had proposed that the Company appointed Mr. Ruth Chaowanagawi, Certified Public Accountant No. 3247 and/or Mr. Narong Puntawong, Certified Public Accountant No. 3315 and/or Ms. Ratana Jala, a Certified Public Accountant No. 3734 of Ernst and Young Limited as auditors of the Company for the accounting period 2006. The Board of Directors' meeting No. 1/2006 held on 24 February 2006 and the Annual General Meeting of Shareholders No. 1/2006 held on Thursday 20 April 2006 had approved the aforesaid appointment.

Respectfully,

Mr. Pisit Leeahtam

Chairman of Audit Committee

Internet Trading (E-Business)

KGI Securities (Thailand) Public Company Limited, one of Thailand's leading securities firms, offers internet trading services to its clients. Clients can look at real time information in order to follow price movements and can access other information 24 hours a day, 7 days a week, wherever they are. Our Company also provides in-depth fundamental and technical research reports issued by KGI's research department as decision making tools for clients.

The Company strives to maintain a high quality of service for clients. This includes fast, consistent and accurate information combined with a low level of commission of only 0.15% for Internet trades. In addition, information on our website is provided in 3 different languages: Thai, English and Chinese to serve both local and foreign clients.

As our Company aims to provide a high level of customer satisfaction, we are continuing to develop our online trading service to make it even more convenient, efficient and secure. Our e-business

division works closely with Settrade.com to arrange quarterly internet trading seminars for our clients and for the general public. In these seminars, clients are trained on how to place an order, and how to use real time information as a decision making tool. Our objective in these seminars is to demonstrate the ease and convenience of internet trading to new clients and clients who have never traded online.

If you have any queries or need additional information or would like to open an Internet Trading account with us, please visit our website: www.kgieworld.co.th.

(B) Securities Dealer

The Company's proprietary trading portfolios faced a difficult operating environment in 2006 due to poor market conditions in both the equity and the fixed income markets. The SET index was very volatile, reaching a high of 788 in May before falling to hit a low of 588 in December.

Although the Proprietary Trading Department and Fixed Income Department paid close attention to their portfolios, the Company still suffered from the volatile markets, and the Company suffered a loss from trading of securities of Baht 78 million.

(C) Investment Advisory

SEC granted an approval to the Company to operate investment advisory business on 6 January 2004, allowing the Company to provide a full range of services.

(D) Financial advisory and securities underwriting

The SEC has granted the Company approval to operate financial advisory business under the scope specified by the SEC which covers the full range of Investment Banking Services, including fund raising, IPOs and secondary market placements, mergers and acquisitions, firm valuations, loan arrangements, debt restructuring and other advisory works. In addition, the Company also provides a securities underwriting service to those companies intending to issue securities including debt, equity, and equity-linked products.

In 2006, the stock market was very volatile, primarily as a result of rising of interest rates, rising oil prices, political uncertainty and FX related regulations. As a result, fewer than expected companies were listed on the stock market. Despite the difficult market environment, our Company acted as a financial advisor and a lead underwriter for 1 IPO, and acted as co-underwriter in 6 other IPOs. Besides IPO and listing services, KGI offered other services to its clients, including; private placements, loan arrangements, M&A related services, debt restructuring, underwriting services, and other advisory work.

Our ability to leverage on KGI's expertise in financial engineering to structure products that suit clients needs is a significant asset. Since we have experience with various financial instruments such as debt, equity, equity-linked securities and a regional financial network, the Company's investment banking team is well positioned to provide a full range of services to clients in both the domestic and foreign capital markets.

(E) Securities Borrowing and Lending (SBL)

The Ministry of Finance granted the Company approval to conduct securities lending and borrowing business on February 26, 1999. The Company was the first broker to act as a principal and agent assisting all types of clients who want to lend or borrow securities: 1. Institutional Lenders, 2. Institutional Borrowers, 3. Retail Lenders, and 4. Retail Borrowers. This service will help increase liquidity and price stability to the Thai market, which will benefit all parties and help to further develop the Thai equity market.

(F) Securities Registrar

The Company received approval to conduct securities registrar business on 14 June 1994, and the Company continues to maintain its securities registrar license in order to support its derivatives products in the future.

(G) Selling Agent of Unit Trust

The Company's fixed income department has been appointed as a selling agent for asset management firms such as One Asset Management Limited, Krungthai Asset Management Public Company Limited, SCB Asset Management, ING Funds (Thailand) Co., Ltd., TMB Asset Management Co., Ltd., Aberdeen Asset Management Co., Ltd., MFC Asset Management Public Company Limited, Kasikorn Asset Management Co., Ltd., and PrimaVest Asset Management Co., Ltd. All clients are advised on the appropriate fund based on their risk tolerance and investment return requirements.

(H) Derivatives

The company is recognized as one of the leaders in innovation in the development of derivative products in Thailand. The Company has spent more than 10 years preparing for issuing and trading of derivatives products. The major shareholder, the KGI Group has also provided valuable assistance by transferring knowledge and technology to the Company. The KGI Group sent derivatives experts to train our staff to be ready for this new market in Thailand. At the same time, the Company sent staff to its related companies in Taiwan and Hong Kong to closely study their sophisticated derivatives markets.

The Company adopts the same program and software as those used in Taiwan and Hong Kong. The software is widely recognized in developed derivatives markets in many countries and should be effective in the Thai market as well. Such system will greatly enhance the risk management capability of the Company in hedging our derivatives positions. The Company is ready to provide services relating to derivatives products to clients. At the moment, the Company focuses mainly on institutional clients who have better understanding about the risks and rewards of such products.

1. OTC Equity Derivatives

OTC Equity Derivatives products are tailor-made, and designed according to client's request. The clients may choose to invest in derivatives for two purposes: a). to reduce risk; and b). to enhance return on their investment portfolio.

- a) Most of the clients who wish to reduce risk of their portfolio are long term equity investors. They'd like to protect against loss on their portfolio by, for example, buying (long) put options.

A put option grants buyer the right to sell stock at agreed price (strike price) at the specified time. Therefore, if market price of such equity is lower than the strike price, buyer has the right to sell such equity at a higher price than the market price

- b) Clients who want to enhance return on investment may buy call options which requires less investment than buying the stock directly. With this leverage, the return on investment in call options can be much higher than the return on investment in stock.

A call option gives the holder a right to buy the underlying stock at the agreed price (strike price) and time. If the stock price increases and exceeds the strike price, call option holder can buy the stock at the agreed price which is lower than the market price of the stock.

The Company would in return reduce its risk by hedging its exposure.

Apart from the basic option as mentioned earlier, the Company has been launching more complex derivatives, such as Put Spread, Asian Call Spread and Digital Call Options, and will innovate more and more to match clients' risk and return profiles in the future. The Company

will regularly organize training/seminars to ensure that our clients thoroughly understand the products before investing in equity derivatives with us and that our equity derivatives products would help reduce risk and/or enhance return of clients' portfolio.

2. Structured Products

In 2006, the Company focused on developing structured products which combines equity derivatives with money market instruments to serve those clients who want to invest in both equity market and money market. In this first stage, the Company offered two types of structured products exclusively to institutional clients who have good understanding and knowledge of derivatives. The two structured products are:

- 2.1 Principal Protected Note: To serve the needs of clients who require principal protection on their investment (can not tolerate loss), and also a high return from investment in equity market;
- 2.2 Equity Linked Note (ELN): To serve the needs of the clients who prefer investment in short term money market with high yield and who can invest in equity market. At present, we provide various types of ELN with maximum term of 270 days, whose return is linked to the price of a SET-listed stock or basket of stocks with good fundamental and high trading volume (Blue chip Stock), including ELN-Vanilla, ELN-Up&Out, ELN-Down&Gain, ELN-Buffer and ELN-4U.

(I) Futures Business

The Company set up a new department, the Futures Department, to act as an agent for clients who wish to trade futures. The Company received a license to conduct futures business from the Securities and Exchange Commission (SEC) and also got approval to act as a futures broker from the Thailand Futures Exchange Plc. (TFEX) and the Thailand Clearing House Co., Ltd. (TCH). Futures trading started on 28 April 2006.

The Company itself also trades futures. Further, it also acted as one of the first three market makers to help increase the liquidity of the Thailand Futures Exchange (TFEX).

In 2006, the Company ranked No. 1 with 16.53% of the SET 50 Index market shares. The Company won the "Best House of the Year 2006", given to the futures brokerage firm with the outstanding performance and best service quality, and won the "Most Active House 2006", given to the futures brokerage firm with the most active futures derivatives business, at the TFEX Best Awards 2006.

Market Overview and Competition

Market Overview in 2006

Thailand's stock market was extremely volatile in 2006. By the end of the year, the market had fallen by 4.8% following a 6.8% gain in the previous year. The key reason for the market volatility and relatively poor performance was the deteriorating political situation. Starting with the dissolution of parliament in February 2006 and the snap election in April 2006, the situation became more uncertain as the Thai courts nullified that election, leading to a political vacuum. On Sep 19, the military staged a peaceful coup d'etat and set up a new interim government.

After that, Thai market conditions improved significantly, and the SET Index posted sharp gains from October to November. However, in December, in order to try and curb the strengthening of the Thai baht, the Bank of Thailand imposed controls on short-term capital flows. The impact on the stock market was devastating, and despite the measures being partially withdrawn the following day, the new FX regulations resulted in a decline in the SET for the full year.

On the economic side, Thai GDP grew strongly, increasing by 6.1% in 1Q06. However, the main reason was the low base effect from 1Q05. During 2Q06 and 3Q06, Thai economic growth remained solid at 4.9% and 4.7%. However, the relatively good economic performance was overshadowed by the political issues described above.

In 2006, daily average turnover was Bt16.4bn, slightly lower than Bt16.5bn in 2005. Meanwhile, foreign investors were net buyers of Bt85bn for the year as a whole. Market capitalization of SET stood at Bt5.08trn at the year end, a decline of just 0.69% compared with Bt5.11trn in 2005.

Overall equity trading in 2006 faced high volatility whilst turnover was flat compared to the previous year and foreign investors increased their share of market turnover. As a result, competition between securities firms, especially local firms, remained fierce. The increased foreign participation resulted in a slightly higher market share for the top 10 securities firms, and most of which concentrated on foreign clients. The market share of the top 10 brokers edged up from 50.1% in 2005 to 51.6% in 2006.

Industry trend in 2007

It's likely that the Thai stock market in 2007 will face continued high volatility as it did during the end of 2006. Foreign investor sentiment towards the Thai market has deteriorated as a result of regulatory issues, particularly the partial capital control and the amendment of the Foreign Business Act. Investors are also concerned about security in the Thailand capital following a series of year-end bomb explosions.

However, there is a good chance that stock market conditions will improve in 2Q07, as the Thai economy is expected to improve in the second half of this year. A key fundamental for the economy, the oil price, has been trending downtrend. This should ease inflation pressure and act as downside cushion for Thai consumption. Coupled with expected increased public expenditure, Thai GDP growth for 2007 should be in the 4.5-5% range. Lastly, daily average turnover in 2007 should be very close to that in 2006, around Bt16bn.

Funding for Products and Services**(A) Source of funds**

If the Company requires new funds, the Company's policy is to try to procure the cheapest source of funds available, and to match the duration of any loan to its needs. As far as possible, the Company will not depend upon one source of funds.

(B) Subordinated Loans from Subsidiary

The Company has subordinated loans from an overseas subsidiary company. These loans are unsecured, interest free Baht loans maturing in September 2008. During the year of 2006, the Company received dividends from this overseas subsidiary company with total amounting to Baht 325 million, and used this to offset against loans borrowed from the subsidiary. As of 31 December 2006, the outstanding balance of the subordinated loan is approximately Baht 1,720 million.

(C) Net capital adequacy ratio

The Office of Securities and Exchange Commission requires that all securities companies should maintain a Net Liquid Capital Rule (NCR) ratio of at least 7% of total liabilities. Currently, the Company's NCR ratio exceeds the SEC's requirement. As of 31 December 2006, the Company's NCR was 39.20%.

(D) Liquidity management policy

The Company analyses its cash flow needs on a daily basis and tries to match its funding and investment in money market instruments to its needs as forecasted.

Future plans

In Year 2007, for the brokerage business, the Company planed to further increase the number of marketing staff for equity brokerage in order to expand client base in both the Stock Exchange of Thailand and Thailand Futures Exchanges.

The Company will expand other new businesses, as follows:

Futures

The Company plans to expand investor base in TFEX, the Company was one of the supporters of the TFEX Futures Camp: Challenge 2007 Project. The project aims to make it easy for investors to learn about the TFEX (Thailand Futures Exchange) market.

Index Option

Thailand Futures Exchange (TFEX) will launch another new product in 3Q07, SET50 Index Options. The new product will rapidly increase trading volume in Futures Exchange. KGI is already working to modify the trading system to cater for this new product and also to educate clients. We will organize seminars for investors and our staff and make every effort to maintain our position as broker with the top market share in Thailand Futures Exchange.

Derivative warrants

The company has been preparing the necessary IT and workforce infrastructure for more than 5 years and expects to launch Derivative Warrants (DW) in 3Q07. The Company expects to launch 2 series of DW worth 400-500 million baht each. DWs, serving as alternative investment vehicle, will help enhance trading liquidity of Thai capital market.

Equity Exchange Traded Fund

The Company joined a group led by One Asset Management Limited which won the right to launch Thailand's first equity exchange traded fund (ETF). The consortium is planning to launch the fund in 2Q07. The company will act as a Participating Dealer (PD), facilitating the creation and redemption of ETF units in the primary market, and as the Market Maker (MM), providing liquidity in the secondary market. The Company is targeting Asset Under Management (AUM) of around 2 billion baht in the first year and also forecasts 30-50% annual growth of AUM in the 2nd and 3rd years. We believe the targets, although ambitious, are achievable considering the capabilities of consortium, whose members have a combined 20% market share in the SET and 36% market share in TFEX.

The risk management department will strengthen its systems to better protect the Company and to support the new businesses.

4. Risks

4.1 Market Risk and Competition risk of the Stock Exchange

The trading volume of the market and the Company's market share have a direct impact on KGI's revenue. Factors that cause market price and volume volatility include political situation, economic outlook, and investors' sentiment (both domestic and international). In addition, the securities business is highly competitive. If the Company is not able to maintain a high quality of service compared with other brokers, it may lose market share. In this regard, the Company has implemented a policy of increasing marketing officers' ability to provide good recommendations and increase value-added services to clients. In addition, the Company has carried out a policy of diversifying its business by developing new products such as stock borrowing and lending, OTC derivative, structured products and futures business.

4.2 Market Risk and Competition risk of Futures Business

The Thailand Futures Exchange (TFEX) was launched on 28 April 2006 with the SET50 Index Futures as the first product. In order to develop futures business, the Company increased its competitive strength by using the experience and advice of KGI Futures Co., Ltd, a leading player in Taiwan market, and was able to offer high quality service to its clients as soon as the TFEX market opened. Since trading derivatives involves significant risks, the Company has established strict procedures for controlling the risks in futures trading. These include requiring the individual clients to place sufficient collateral before any futures trading.

4.3 Credit Balance, Futures and Settlement Risk

The Company has assigned its Risk Management Committee to review and approve the Company's policy on risk management in credit balance accounts, credit line approval guideline, collateral management and valuation guidelines, IT systems, and the overall policy and strategy in managing the company's risk. Therefore, the Company believes that it can minimize its risk from credit balance, and futures accounts and from settlement risk.

As of 31 December 2006, the Company has receivables due from brokerage services to clients totaling Baht 381million and credit balance loans totaling Baht 917million.

4.4 Interest rate risk

As of 31 December 2006, the Company had no loans from financial institutions. However, the Company has invested in fixed income instruments and the values of those are sensitive to interest rate movements.

4.5 Exchange Rate risk

As of 31 December 2006, the Company has investments in subsidiary companies in foreign currency under equity method of USD 60 million (equivalent to Baht 2,508 million). However, the Company has obtained Thai Baht loans from one of those subsidiaries totaling approximately Baht 1,720 million. As at 31 December 2006, the Company has not entered into any forward exchange contracts to manage its foreign exchange risk.

4.6 Liquidity risk

The Company has adequate liquidity. As of 31 December 2006 the company had cash and cash equivalents totaling Baht427million, and it had Baht 118million long term deposits at financial institutions. The Company's net capital ratio (NCR) was 39.20%.

4.7 Securities investment risk and return risk

The Company has assigned its Risk Management Committee to set strict guidelines and policies regarding asset allocation, portfolio limits and risk control in order to manage risk of losses due to market volatility. On 31 December 2006 the Company's net investment in debt and equity securities was Baht 3,397million (76% in net short term investments, 24% in net long term investments).

4.8 Risk from investment in subsidiaries and associated companies

This type of risk may arise if the subsidiaries and associates companies incur losses. The company's investments in subsidiaries and associated companies are accounted for under the equity method.

4.9 Risk from expanding branch network

The opening of new branch involves risks, primarily by increasing the company's fixed and variable costs. However, the Company had a thorough review process before establishing new branches. A feasibility analysis was first conducted, in which the population, economic position and prospects, and the number of competitors operating in such areas were considered. A profit-loss projection was made together with a study on the impact of the establishment of the new branch on the maintenance of the net capital adequacy of the Company. The Company did not open any new branch in 2006.

4.10 Risk from operating underwriting and financial advisory businesses

In operating an investment banking business, including an underwriting business, there is a risk of losses from unsubscribed securities that must be transferred to the Company's portfolio. Inappropriate size or pricing of issues, unexpected fluctuations of the stock market, interest rates or foreign exchange rates can cause the investors not to subscribe for such securities. To reduce such risk, the Company studies and analyzes information regarding the issuer and the interest of clients or investors. In the financial advisory business, the Company always study clients carefully and conduct due diligence before entering deals.

4.11 Risk from having a major shareholder

As of 30 March 2006 (the last registration close book date), the KGI Group owned approximately 34.98% of the Company's total shares. KGI Group as a major shareholder may exercise greater influence over the Company's management and business policies. However, if the KGI Group wishes to hold more than 50% of the Company, it still needs to seek approval from relevant government agencies.

4.12 Risk from establishing a Thai Trust Fund and having a Non-Voting Depository Receipts (NVDRs)

Since the investors in the Thai Trust Fund and NVDRs holders have no voting rights, this effectively leads to a decrease in the number of voting shares. As a result, major shareholders may have an increased level of control over the company. However, as of 31 December 2006, there were no shares held by the Thai Trust Fund and investors had bought only 107,154,968 NVDRs shares (equivalent to 5.38% of paid-up capital). (See details of Thai Trust Fund and NVDRs in no. 8 Capital structure)

4.13 Risk related to Derivatives products

Having taken into consideration various risks involved in derivatives, the Company has approved the Equity Derivatives Department and Fixed Income Department to sell derivative products to clients. However, the Risk Management Committee has to first approve the document called "Product Program" before the Equity Derivatives Department and Fixed Income Department can issue derivatives to clients. The Product Program mainly focuses on (1) characteristics of securities, services, and target clients; (2) risk policies such as acceptable level of loss and other risk policies depending on attributes of securities and services offered to clients; and (3) internal operational procedures including internal control.

The Risk Management Department monitors the Company's exposure on a daily basis to ensure compliance with the approved risk policies. The Company is therefore confident that it has put in place a system for limiting risks associated with derivatives to an acceptable minimal level.

5. Company's Shareholders and Management

5.1 Company's Shareholders

However, this excluded Senior Vice President of Finance and Accounting Department's compensation.

5.2.4 Practical guidelines on good corporate governance

The Company's Board of Directors believes that good corporate governance will benefit the Company, improving the quality of management and encouraging long term growth. A transparent operating policy will ensure fair and equal treatment for shareholders, clients, suppliers, related parties, and employees, will enhance and stabilize the Company's returns.

The Company's policy is to comply with the 15 principles of good corporate governance of the Stock Exchange of Thailand, as follows:

Principle 1: Policy on corporate governance

- The Company will ensure that all shareholders will be treated equally and will arrange the shareholders' meetings in a way that ensures all shareholders will be able to participate.
- The Company will give consideration to stakeholders of the Company including shareholders, clients, suppliers, creditors, management, employees, the state and the communities in which the company operates.
- The Company will set the roles, duties and responsibilities of the Management in a clear, accurate and appropriate way. The Board will set up sub-committees to help it study various issues in detail as necessary.
- The Company will set the schedule of Board of Directors' Meetings in advance and will provide minutes covering all important issues.
- The Company will disclose all important information accurately, transparently and at the appropriate time.
- The Company has set up an internal audit division, and a Risk Management Department to manage and control risks.
- The Company will ensure that the Board of Directors, Management, and employees understand and perform in accordance with the Company's code of conduct and good corporate governance guidelines.

Principle 2 Shareholders rights and equitable treatment

The Company recognizes the importance of shareholder's rights and their entitlement to receive equitable treatment. The Company provides opportunities for studying and understanding information about the Company. The Company will ensure that Shareholders receive all necessary information in a timely manner. The Company will allocate appropriate time and equal opportunities for all shareholders to express their opinions and raise any questions at shareholder meetings, according to the agenda and the issues presented to the meetings.

Principle 3 Various groups of stakeholders

The Company gives importance to stakeholders' rights and interests. The Stakeholders of the Company include shareholders, clients, suppliers, creditors, management, employees, state agencies and related agencies, and the society and community in which the Company operates. The Company believes that a good relationship between the Company and its stakeholders will help the Company to succeed in the long run. The Company's policies regarding treatment of various groups of stakeholders are as follows:

(1) Shareholders

The Company shall treat all shareholders equally and attempt to provide a return on investment which is sufficient and fair.

(2) Clients

The Company ensures that client information is kept confidential. The Company has arranged several seminars to educate our clients. Additionally, the Company provides channels, such as phone and e-mail to receive clients' complaints and comments. The Company will deal with complaints promptly, accurately and fairly.

(3) Employees

In the competitive environment of business, the Company values its human resources and regards them as important human capital. The Company also gives high priority to developing and strengthening the efficiency of our employees. This should improve their performance and the efficiency of the organization. The Company organizes training programs to educate our employees.

(4) Government, state agencies and related agencies

The Company shall comply with government policies, laws, related rules and regulations.

(5) Society and Community

KGI Thailand has always been aware of its responsibilities as a good corporate citizen of Thailand. The Company contributed to and supported projects in 2005-2006 as follows:

- In 2005 the company donated Baht 20 million for disaster relief after the Tsunami hit southern Thailand and the Company's Board of Directors approved the donation of Baht 1 million per year for 3 years to projects sponsored by Her Royal Highness Princess Maha Chakri Sirindhorn's foundation, which focus mainly on education. In the current year we will continue to support the second phase of this Princess's project.
- In September 2006, Company's employees joined in planting trees for the sustainable forest program in honor of the 60th anniversary of His Majesty the King's Accession to the Throne. The trees were planted on 10 rai of land in Kuiburi District, Prachuabkhirikhan Province and in October 2006 KGI together with our subsidiary 1AM, as a tribute to H.M. the King, sponsored the performance by the Thailand Philharmonic Orchestra of "The Celebration for Maharajah: The Great King of Music"

(6) Suppliers

The Company will treat all suppliers fairly and transparently. The Company has reviewed purchasing procedures and systems to ensure they are appropriate.

(7) Creditors

The Company shall comply with contract terms and conditions and treat creditors fairly.

(8) Competitors

The Company shall not take unfair advantage of its competitors, and will treat them professionally.

Principle 4 Shareholders meeting

In 2006, the Company held an annual general meeting of shareholders on 20th April 2006, at 2 p.m., at Montien Hotel, Surawongse Road, Bangkok. The procedures were:

- 1) The Company submitted the notice of the meeting together with supporting information regarding each agenda item to all shareholders 14 days prior to the AGM date;
- 2) The Company informed all shareholders regarding the meeting procedures;
- 3) 6 Directors and 3 Independent Directors were present at the meeting in order to answer questions from shareholders; and
- 4) The Chairman of the Meeting allowed all shareholders to ask questions and express their opinions.

Principle 5: Leadership and vision

The Company's Board of Directors helps to set the Company's strategies and goals. They also supervise the Company's operations to ensure that the management operates the business effectively, and according to their plans. Management presents the performance and plans of each business unit at Board Meetings.

Principle 6: Conflict of interest

The Company has carefully considered conflict of interest in board of directors meetings or shareholders meetings. Directors or shareholders that have any interest in any agenda of the meeting will disclose such interest and will not vote on such agenda. For transactions that might lead to a conflict of interest and for connected transactions, the Company has a policy that follows SET regulations. Details about these transactions have been disclosed in annual report as well as in Form 56-1.

Principle 7: Business ethics

The Company provides a code of ethics or statement of business conduct for employees to ensure that they are aware of, understand, monitor, and comply with all codes of conduct, rules, laws, and regulations of the securities business.

The Board of directors' meeting no. 2/2003 dated March 6, 2003 acknowledged the Company's policy on "Insider Information Trading", as follows:

- 1) No director or member of Management may purchase or sell KGI securities in such a way as to take advantage of other persons by using information likely to cause a material change in the price of securities which has not yet been disclosed to the public.
- 2) Director and Management may not purchase or sell KGI securities for one month prior to the dead line to submit financial statements to the SEC, and they may not purchase or sell KGI securities until 1 day after the results have been disclosed to the public.
- 3) After a director or member of Management purchases or sells KGI securities, he/she must report his/her change in securities holding according to Section 59 of the Securities and Exchange Act B.E. 2535

Principle 8: Balance of power for non-executive directors

As of 15 March 2007, the Board of Directors consisted of 12 people; 4 were executive directors, 5 were representatives from the major shareholder, and 3 were independent directors, accounting for 25% of the board. Four directors have attended director training programs of the Thai Institute of Directors ("IOD"), as follows:

Name (As of 31 December 2006)	Representative Directors from major shareholder	Independent Directors	Directors who attended IOD Program
1. Mr. Chin-Lung Tseng	✓	-	-
2. Dr. Pisit Leeahtam	-	✓	DCP 18/2002
3. Mr. Wisit Wongpaisan	-	-	-
4. Mr. Wei Chang Fang	-	-	-
5. Dr. Don Bhasavanich	-	✓	DCP 62/2005 ACP 7/2005 FND 8/2004

10. Mr. Tuan - Wen Wu	✓	-	-
11. Ms. Pi - Lin Huang	✓	-	-
12. Mr. Yen Chih - Chien	✓	-	-

Principle 9: Aggregation or segregation of positions

Although the Company's Chairman is a representative of the major shareholder, the Chairman is not the same person as the President. This is to segregate the roles of setting policies and control of operational management. In addition, the Company has 3 independent directors who review the Company's operational controls.

Principle 10: Remuneration of directors and the management

The Company has specified directors' and management's remuneration clearly and with transparency. The remuneration of directors will be comparable with similar businesses and will be appealing enough to attract and retain quality directors. Moreover, directors' remuneration must be approved by a shareholders' meeting.

The Company has set up the Compensation Committee in order to consider the compensation of the Company's top management in an unbiased manner. The compensation of the Company's top management and Directors' remuneration are disclosed in Form 56-1.

Principle 11: Board of Directors' meeting

The Company's policy is to arrange a board of directors' meeting at least once every 3 months. Notice of the meeting will be sent to the Board of Directors 7 days prior to the meeting. The Company also keeps proper minutes of each meeting in writing. In 2006, 5 board of directors' meetings were held.

Principle 12: Committees

The Board has appointed several committees to help the board study various issues in detail. These committees are the Audit Committee, Compensation Committee, Risk Management Committee, Debt Recovery Committee, Purchasing Committee, Human Resource Committee, Disciplinary Committee, Welfare Committee, Health and Environment Committee, and ESOP Committee. Each committee has responsibilities as stated in item 9: Management.

Principle 13: Internal audit control system and risk management

Internal Audit and Compliance Department will review all operations of the Company and its employees to monitor compliance with rules, regulations, and standards of securities businesses. The Audit Department will report directly to the Audit Committee. Furthermore, the Company has set up a Risk Management Committee to be responsible for approval and review of risk management policy in terms of credit lines, evaluation of collateral, and others.

Principle 14: Directors' Reporting

The Board of Directors has to approve the financial reports, Annual Registration Statement (form 56-1) and annual reports for filing with SEC and for presenting to the Shareholders' meeting. The Board has to ensure that the financial statements shows complete and correct information regarding the financial status and cash flow of the Company and its subsidiaries.

The Board has appointed an Audit Committee, comprising Independent Directors, to ensure that the financial statements comply with the generally accepted accounting standards and disclose all necessary information in an accurate manner. The Directors have also ensured that the Company provides reports on its internal control system to the Auditor and the Audit Committee at least once a year.

Principle 15: Disclosure and relations with investors

The Company discloses information transparently, correctly, and completely so that investors and related parties will receive information accurately, transparently and in a timely manner. The Company has set up an Investor Relations Division to be the representative of the Company which can be contacted by institutional investors, analysts and other investors. Tel No.: 02-231-1111 ext.175 and 177.

5.2.5 Prevention of the misuse of insider information by Executives

The Board of Directors has set up a policy to prevent the misuse of inside information by prohibiting directors and managers from purchasing or selling KGI shares for one month prior to the disclosure of financial statements to the public until 1 day after the disclosure. In the case where directors or managers purchase or sell KGI shares, they must report the transaction to the SEC in accordance with Section 59 of Securities and Exchange Act. The punishment for those who do not follow the rules and regulations will be considered by the Disciplinary Committee.

The Company has rules and regulations for staffs relating to securities trading including rules on prohibition of use of inside information. For example, internal audit department has designated Research List, Grey List and Restricted List for staffs in departments which deal with inside information.

5.2.6 Internal Control

The Company's Audit Committee is responsible for reviewing the Company's financial statements including quarterly, semi-annual and annual financial statements. By coordinating with external auditors and the relevant managers, the Audit Committee ensures that the Company discloses information fully and accurately. The Audit Committee also considers the selection and appointment of the external auditor and the auditor's fees.

In addition, the Audit Committee evaluates internal controls and supervises the performance of internal audits to ensure that the Company has appropriate and effective internal control systems in compliance with the securities laws, Stock Exchange regulations and related laws. The Audit Committee achieves this by evaluating the Internal Audit and Compliance Department's Audit Reports, Annual Compliance Report and the Securities and Exchange Commission's Audit Report. The Audit Committee also advises the Company on how to improve its internal control system in order to prevent any possible damages to the Company and to comply with relevant laws and regulations. (See details in Attachment 3: Audit Committee Report)

For subsidiary and associated companies, the Company will dispatch representatives to act as directors in order to supervise their business operations and to maximize returns for the Company and its shareholders.

5.3 Dividend Policy

The Company has a flexible dividend policy. Any dividend payment will be considered by the Board of Directors and, if approved, be proposed to the shareholders, on a case by case basis, and will take into account prevailing business conditions, outlook, investment opportunities, and other relevant factors.

For our subsidiary's dividend policy, the subsidiary's board will recommend the appropriate dividend by looking at the profit of the subsidiary company and available investment opportunities.

(see details of dividend in section 31 of the Notes to Financial Statements)

6. Connected Party Transactions

During the years 2006 and 2005, the Company had significant business transactions with its subsidiaries and associated/related companies (related by way of common shareholders and/or common directors), which have been concluded on commercial terms and bases agreed upon in the ordinary course of business between the Company and those companies. Please see details of related party transactions in Section 30 of Related Party Transactions of the Notes to Financial Statements for the year ended 31 December 2006.

Necessity of and reason for transactions

The Company's connected party transactions, which include dividends and fees, were conducted at a fair market price and according to general business practice in compliance with relevant notifications and regulations. Opinions from outside directors or independent advisor were sought when required by regulations. These transactions were necessary and reasonable and served the benefit of the Company.

Process for approval of connected party transactions

The Company certifies that future connected transactions between itself and subsidiaries and associate/related companies will be conducted at a fair market price and according to general business practice. They will be carried out in compliance with the notifications, regulations, orders or requirements of the SET, which include stipulations regarding disclosures of information, connected transactions and acquisitions or disposal of key assets of listed companies or subsidiaries.

In the event that the transactions of the Company or its subsidiaries and associated/related companies relate to persons who may have special interests or conflicts of interest, the Company will disclose these in the notes to the audited financial statements. When required by regulations, those parties who do not have special interests (i.e., independent directors, the Audit Committee, an independent expert or the Company's auditor) will provide opinions on the fair market price and suitability of such transactions as a basis for further decision-making by the Board of Directors or the shareholders.

8. Financial Statements

8.1 Summary of the Report of the Independent Auditor for 2005-2006.

The Company appointed Ms. Ratana Jala, Certified Public Accountant no. 3734 of Ernst & Young Office Limited, as auditor for the year 2005 - 2006. The auditor expressed opinions on the consolidated financial statements for the year 2005 - 2006 as follows:

- Year 2005 : The Auditor expressed an unqualified opinion but drew attention to Note 19 to the financial statements which stated that as on the balance sheet date, the Company had a share discount of approximately Baht 1,010 million. The Meeting of the Board of Directors No. 1/2006, dated 24 February 2006, had approved a share capital reduction plan and the transfer of share premium generated from the reduction of share capital to offset the share discount. The share capital reduction plan had to be approved by a meeting of the shareholders of the Company before it could be implemented. Before this process was completed if any dividend was paid by the Company, the balance of retained earnings remaining after such dividend payment must not have been less than the balance of the share discount.

- Year 2006: The auditor's report for the 2006 does not contain any qualified opinion.

KGI SECURITIES (THAILAND) PUBLIC COMPANY LIMITED
AND ITS SUBSIDIARY COMPANIES
REPORT AND CONSOLIDATED FINANCIAL STATEMENTS
31 DECEMBER 2006 AND 2005

Report of Independent Auditor

To The Board of Directors and Shareholders of
KGI Securities (Thailand) Public Company Limited

I have audited the consolidated balance sheets of KGI Securities (Thailand) Public Company Limited and its subsidiary companies as at 31 December 2006 and 2005, the related consolidated statements of income, changes in shareholders' equity and cash flows for the years then ended and the separate financial statements of KGI Securities (Thailand) Public Company Limited for the same periods. These financial statements are the responsibility of the Company's management as to their correctness and the completeness of the presentation. My responsibility is to report on these financial statements based on my audits.

I conducted my audits in accordance with generally accepted auditing standards. Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. I believe that my audits provide a reasonable basis for my opinion.

In my opinion, the financial statements referred to above present fairly, in all material respects, the financial position of KGI Securities (Thailand) Public Company Limited and its subsidiary companies and of KGI Securities (Thailand) Public Company Limited as at 31 December 2006 and 2005 and the results of their operations and cash flows for the years then ended in accordance with generally accepted accounting principles.

KGI SECURITIES (THAILAND) PUBLIC COMPANY LIMITED
AND ITS SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED 31 DECEMBER 2006 AND 2005

1. GENERAL INFORMATION

KGI Securities (Thailand) Public Company Limited (“the Company”) was incorporated as a public limited company under the Public Limited Companies Act. The Company operates its business in Thailand with 5 securities licenses, securities brokerage, securities dealing, financial advisory, securities underwriting and securities borrowing and lending services. In addition, the Office of the Securities and Exchange Commission (SEC) has granted the Company approval to operate Securities Registrar business, derivative agent, financial advisory business, Over-the-Counter (OTC) derivative business and to act as a sales agent for unit trusts in designed areas as specified by SEC.

The Company's registered office is located on the 9th, 23rd-25th and 45th Floor, United Center Building, 323 Silom Road, Kwang Silom, Khet Bangrak, Bangkok and it has 19 branches in Bangkok and upcountry.

2. BASIS OF PREPARATION

The financial statements have been prepared in accordance with accounting standards enunciated under the Accounting Profession Act B.E. 2547 and the presentation of the financial statements has been made in compliance with requirement of the notification of the office of the Securities and Exchange Commission relating to the format of the financial statements of securities companies No. Sor. Thor. Nor. 26/2549 dated 29 June 2006.

The financial statements have been prepared on a historical cost basis except where otherwise disclosed in the accounting policies.

3. BASIS OF CONSOLIDATION

3.1 The consolidated financial statements include the financial statements of the Company and the following subsidiary companies:

Company's name	Business	Percentage of shareholding		Country of incorporation	Assets as a percentage to the consolidated total assets as at 31 December		Revenues as a percentage to the consolidated total revenues for the year ended 31 December	
		2006	2005		2006	2005	2006	2005
		Percent	Percent		Percent	Percent	Percent	Percent
One Asset Management Limited	Mutual fund management	96	95	Thailand	3.76	3.80	19.69	19.00
KGI Securities (Thailand) International Holdings Limited (HOLDCO)	Holding company	100	100	Hong Kong	0.43	0.54	-	-
KGI (Thailand) Holdings Limited (KTHL)	Holding company	100	100	British Virgin Islands	12.13	12.95	-	-

- 3.2 The consolidated financial statements as at 31 December 2005 did not include the financial statements of the 100-percent owned KGI S-One Corporation Public Company Limited both because of its immateriality to the accounts and because this company registered its dissolution with the Ministry of Commerce on 23 April 2002. Its liquidation was completed on 8 September 2006.
- 3.3 The consolidated financial statements as at 31 December 2005 did not include the financial statements of the 100-percent owned KGI E-World Company Limited both because of its immateriality to the accounts and because this company registered its dissolution with the Ministry of Commerce on 29 December 2005. Its liquidation was completed on 12 July 2006.
- 3.4 The financial statements of the subsidiary companies incorporated overseas are translated to Thai Baht using the closing exchange rate ruling on the balance sheet date for assets and liabilities, with the exception of those covered by forward exchange contracts which are translated into Thai Baht at the contract rates, and using the average exchange rate with respect to revenues and expenses. The resultant differences have been shown in shareholders' equity, under the caption of "Translation adjustment".
- 3.5 The Company records the excess of the cost of investment in subsidiary company over their attributable net worth as of the acquisition date as "Intangible asset-Goodwill" in the consolidated balance sheet. This is being amortised as expenses on a straight-line basis over a period of ten years.

3.6 Material balances and transactions between the Company and its subsidiaries, investments in subsidiaries in the Company's accounts, and the subsidiaries' share capital have been eliminated from the consolidated financial statements.

4. CHANGE IN ACCOUNTING POLICY/ADOPTION OF NEW ACCOUNTING STANDARDS

In October 2006, the Federation of Accounting Professions issued Notification No. 26/2006 regarding Accounting Standard No. 44 "Consolidated Financial Statements and Accounting for Investments in Subsidiaries" (Amendment No. 1), under which investments in subsidiaries, jointly controlled entities and associates are to be presented in the separate financial statements under the cost method rather than the equity method. Entities which are not ready to adopt the cost method in 2006 can continue to use the equity method through the end of 2006 and adopt the cost method as from 1 January 2007.

In this regard, the Company has elected to adopt the change in 2007. Adoption of the change in 2007 will necessitate the restatement of the Company's 2006 separate financial statements to be presented for comparative purposes along with the financial statements for 2007. The restatement will have the effect of increasing net income in the separate income statement for 2006 by approximately Baht 314.8 million (Baht 0.16 per share) and decreasing net worth in the balance sheet at 31 December 2006 by approximately Baht 115.3 million.

5. SIGNIFICANT ACCOUNTING POLICIES

Significant accounting policies adopted by the Company and its subsidiaries are summarized below.

5.1 Revenue recognition

(a) Brokerage fee

Brokerage fees from securities business and brokerage fee from derivatives business are recognised as income on the transaction dates.

(b) Fees and service income

Fees and service income are recognised when services have been rendered taking into account the stage of completion.

- (c) Gains (losses) on trading in securities and derivatives

Gains (losses) on trading in securities and derivatives are recognised as income/expenses on the transaction dates.

- (d) Interest and dividends

Interest is recognised as income on an accrual basis. Dividends are recognised as income when the right to receive the dividends is established.

- (e) Interest on credit balance loans

Interest is recognised over the term of the loans based on the amount of principal outstanding. No accrual has been made for certain loans which, under Notification No. Kor. Thor. 5/2544 dated 15 February 2001 of the Office of the Securities and Exchange Commission, are not qualified for recognition of interest on an accrual basis and consideration of other relevant factors.

Discounts or interest already included in the face value of notes receivable or loans are deferred and taken up as income evenly throughout the terms of the notes or loans.

5.2 Interest on borrowings

Interest on borrowings is charged to earnings on an accrual basis.

5.3 Cash and cash equivalents

Cash and cash equivalents include cash on hand, all bank accounts and depository note maturing within 3 months including call notes receivable and term notes receivable issued by financial institutions with an ordinary maturity of 3 months or less and not subject to withdrawal restrictions.

5.4 Recognition and elimination of customer deposits

Money which customers have placed with the Company for cash accounts and credit balance accounts for securities trading, including amounts which customers have placed as security for derivatives trading is recorded as assets and liabilities of the Company for internal control purposes. As at the balance sheet date, the Company excludes these amounts from both assets and liabilities and presents only assets which belong to the Company.

5.5 Securities borrowing and lending

The Ministry of Finance granted the Company approval to conduct securities borrowing and lending business on 26 February 1999, whereby the Company can act as a principal or as an agent of the lender or borrower. The Company records its obligations to return borrowed securities which it has sold short or lent as “Securities borrowing payables” in the balance sheet. At the end of the year the balance of Securities borrowing payables, which securities has sold short is adjusted based on the latest offer price quoted on the Stock Exchange of Thailand. Gains or losses arising from such adjustment are included in determining income. Securities lent to customers are recorded as “Securities borrowing receivables” in the balance sheet. Cash paid or received as collateral for securities borrowing and lending is recorded as “Guarantee deposit receivables” or “Guarantee deposit payables”. Fees for borrowing and lending are recognised on an accrual basis over the term of the lending.

5.6 Investments

- a) Investments in securities held for trading are presented at fair value. Gains or losses arising from changes in the carrying amounts of securities are included in determining incomes.
- b) Investments in available-for-sale securities are determined at fair value. Changes in the carrying amounts of securities are recorded as separate items in the shareholders’ equity until the securities are sold, the changes are then included in determining incomes.
- c) Investments in debt securities both due within one year or expected to be held-to-maturity are stated at amortised cost.
- d) Investments in non-marketable equity securities, which the Company classifies as other investments, are valued at cost net of allowance for impairment (if any).

- e) Investments in subsidiary and associated companies are accounted for under the equity method.

The fair value of marketable securities is based on the latest bid price of the last working day of the year as quoted on the Stock Exchange of Thailand. The fair value of debt instruments is determined based on required rate of return or the yield rates quoted by the Thai Bond Market Association. The fair value of unit trusts is determined from their net asset value.

Losses on impairment of investments (if any) are included in determining incomes. Allowance for loss on the impairment of other investments is based on net realisable value with reference to the net book value of ordinary share and other relevant factors.

The weighted average method is used for computation of the cost of investments.

5.7 Receivable from Clearing House

Receivable from Clearing House comprises the net balance receivable from Thailand Securities Depository in respect of securities trades settled through the Clearing House of Thailand Securities Depository and the net receivable from Thailand Clearing House including amounts pledged with Thailand Clearing House as security for derivatives trading.

5.8 Securities and derivatives business receivables, and allowance for doubtful accounts

Securities and derivatives business receivables comprise the net securities and derivatives business receivables, after deducting allowance for doubtful accounts, and include related accrued interest receivables.

In addition, securities business receivables include the net receivable balances of cash accounts, credit balance accounts, securities borrowings receivable and guarantee deposit receivables (which comprise cash placed as security with securities lenders or securities depositories) and other receivables such as overdue cash customer accounts and securities receivables which are the subject of legal proceedings, are undergoing restructuring or are settling in installments.

The Company has provided an allowance for doubtful debts based on a review of debtor's ability to make repayment, taking into consideration recovery risk and the value of the collateral. Such debt classifications and provisions are made in accordance with the guidelines laid down in Notification No. Kor. Thor. 5/2544 dated 15 February 2001 of the Office of the Securities and Exchange Commission, and consideration of other relevant factors.

5.9 Premises and equipment and depreciation

Land is stated at cost. Building and equipment are stated at cost less accumulated depreciation. Depreciation is calculated by reference to their cost on a straight-line basis over the following estimated useful lives :-

Building and building improvement	20	years
Furniture, fixtures and equipment	5	years
Vehicles	5	years

No depreciation is provided for land and installation in progress.

Depreciation is included in determining income.

5.10 Financial lease

Leases of vehicles which transfer substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the lower of the fair value of the leased assets and the present value of the minimum lease payments. The outstanding rental obligations, net of finance charges, are included in other long-term payables, while the interest element is charged to the income statements over the lease period. The assets acquired under finance leases is depreciated over the useful life of the asset.

5.11 Intangible assets and amortisation

Intangible assets are stated at cost less accumulated amortisation. Amortisation of intangible assets is calculated by referring to their cost on a straight-line basis over the following estimated useful lives :-

Deferred underwriting license fee	10	years
Deferred derivative agent license fee	5	years
Computer software	5	years

Amortisation is included in determining income.

5.12 Property foreclosed

Property foreclosed represents land received in payment of debt from securities business receivables, and is stated at the lower of cost or net realisable value. Loss on impairment is included in determining incomes.

5.13 Securities sold under repurchase agreements

The Company enters into sales of securities under agreements to repurchase securities at certain dates in the future at a fixed price. Securities sold under repurchase agreements presented as liabilities in the balance sheet are stated at amounts received from the sale of those securities and the underlying securities are treated as collaterals.

The difference between the purchase and sale considerations is recognised on an accrual basis over the period of the transaction and is included in expenses on borrowings.

5.14 Payable to Clearing House

Payable to Clearing House comprises the net balance payable to Thailand Securities Depository in relation to securities trading settlements made through the Clearing House of Thailand Securities Depository and the net balance payable to Thailand Clearing House.

5.15 Securities and derivatives business payables

Securities and derivatives business payables are the obligations of the Company in respect of its securities and derivatives business with outside parties, such as the net payable balances of cash accounts, securities delivery obligations as a result of short sales or securities borrowing, and obligations to return assets held by the Company as collateral for securities lending.

5.16 Provisions

Provisions are recognised when the Company and the subsidiaries companies have a present obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation. In the event that no independent market value can be obtained, then an estimate is assessed.

5.17 Related party transactions

Related parties comprise enterprises and individuals that control, or are controlled by, the Company, whether directly or indirectly, or which are under common control with the Company.

They also include associated companies and individuals which directly or indirectly own a voting interest in the Company that gives them significant influence over the Company, key management personnel, directors and officers with authority in the planning and direction of the Company's operations.

5.18 Foreign currency translation

Foreign currency transactions occurring during the period has been translated into Baht at the rates ruling on the transaction dates. Assets and liabilities in foreign currencies outstanding on the balance sheet date have been translated into Baht at the rates ruling on the balance sheet date, with the exception of assets and liabilities covered by forward exchange contracts which are translated into Thai Baht at the contract rates.

Exchange gains and losses are included in determining income.

5.19 Impairment of assets

The Company and the subsidiary companies assess at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, the Company and the subsidiary companies make an estimate of the asset's recoverable amount. Where the carrying amount of the asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. Impairment losses are recognised in the income statement. An asset's recoverable amount is the higher of fair value less costs to sell and value in use.

5.20 Employee benefits

Salary, wages, bonuses and contributions to the social security fund and provident fund are recognised as expenses when incurred.

5.21 Income tax

The Company and its local subsidiary record income tax in the accounts based on the taxable profits determined in accordance with tax legislation.

5.22 Derivatives

The Company engaged in the trading of financial derivative instruments, in response to client demand and/or trading purpose. Derivatives are regarded as off-balance sheet items and changes in the carrying amounts of derivatives are included in determining income.

Obligations under derivatives which the Company entered into for trading purpose are regarded as off-balance sheet items. Amounts deposited as security for these derivatives are recorded as receivable from Thailand Clearing House and gains (losses) from changes in the fair value of derivatives are included in determining incomes. The fair value of derivatives is based on the daily settlement prices quoted by Thailand Futures Exchange Public Company Limited.

5.23 Use of accounting estimates

Preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions in certain circumstances, affecting amounts reported in these financial statements and related notes. Actual results could differ from these estimates.

During 2005 the Company was sued by a third party, seeking to have the court order that the mortgage instrument for the land placed as collateral for an installment receivable be revoked. At that time, the management of the Company believed that the mortgage had been made in good faith and that the Company would win the case, and the Company thus assigned a valuation to the collateral of 50 percent of the value appraised by an independent appraiser. However, in the year 2006 the plaintiff lodged a petition to withdraw the lawsuit and therefore the Company adjusted its valuation of the collateral in accordance with the relevant notification issued by the Office of the Securities and Exchange Commission. As at 31 December 2006, the outstanding balance of this installment receivable was Baht 69 million, against which land valued at approximately Baht 40 million (representing 80 percent of the value appraised by an independent appraiser) has been mortgaged as collateral.

- 11.3 As at 31 December 2006, securities business receivables include guarantee deposit receivables of approximately Baht 414 million, which comprise cash which the Company placed as collateral for securities borrowed as part of the securities borrowing and lending business. As at the same date, the fair value of those borrowed listed securities was approximately Baht 330 million. All of such borrowed securities were sold under short sale transactions or relent to others.

12. TROUBLE DEBT RESTRUCTURING

During the year 2006, the Company entered into debt restructuring agreements with securities business receivables with total net book values before deducting allowance for doubtful accounts amounting to approximately Baht 7.5 million. The receivables were restructured by means of rescheduling repayments or accepting the transfer of assets for debt settlement. The Company had previously either set aside full allowance for doubtful debt for such receivables or written them off. Details of receivables restructured during the year 2006 are as follows :-

During the year 2006, the Company received the interim dividends from this overseas subsidiary company with total amounting to Baht 325 million, and used this to offset against loans borrowed from the subsidiary. As at 31 December 2006, the outstanding balance of the subordinated loans is approximately Baht 1,720 million.

20. SHARE CAPITAL

Year 2006

The Annual General Meeting of the shareholders of the Company held on 20 April 2006 approved the following :-

- (a) The reduction of the Company's paid up and registered capital from Baht 3,983,526,260 to Baht 1,991,763,130 by way of a reduction of par value of the ordinary shares from Baht 2 to Baht 1 per share.

- (b) The offset of the share premium of Baht 1,991,763,130 generated by the reduction of the par value of the ordinary shares from Baht 2 to Baht 1 against the remaining share discount. After the capital reduction and offset, the outstanding balance of the Company's share premium was Baht 982,166,480.

On 17 July 2006, the above capital reduction was approved by the Office of the Securities and Exchange Commission and there was no objection from the creditors. The Company therefore registered the reduction in its capital with the Ministry of Commerce on 7 August 2006 and transferred share premium to offset the remaining share discount.

Year 2005

The Annual General Meeting of the shareholders of the Company held on 21 April 2005 approved the following :-

- The reduction of the Company's registered capital from Baht 23,049,357,922.50 (3,073,247,723 ordinary shares of Baht 7.50 each) to Baht 14,938,223,475 (1,991,763,130 ordinary shares of Baht 7.50 each) through the cancellation of 1,081,484,593 unissued ordinary shares with a par value of Baht 7.50 each, previously reserved to accommodate the exercise of Warrant #4, which expired on 30 April 2004.
- The reduction of the Company's registered and paid-up capital by reducing the par value of ordinary shares as follows :-
 - (a) The reduction of the Company's registered capital from Baht 14,938,223,475 (1,991,763,130 ordinary shares at Baht 7.50 each) to Baht 3,983,526,260 (1,991,763,130 ordinary shares at Baht 2 each) and ;
 - (b) The reduction of the Company's paid-up capital from Baht 14,938,223,475 (1,991,763,130 ordinary shares at Baht 7.50 each) to Baht 3,983,526,260 (1,991,763,130 ordinary shares at Baht 2 each).
- The offset of the share premium of Baht 10,954,697,215 generated by the reduction of the par value of the shares from Baht 7.50 to Baht 2.00 against the share discount of Baht 11,964,293,865. After the capital reduction and offset, the balance sheet would present discount on common shares of Baht 1,009,596,650.

The capital reduction detailed above was approved by the Office of the Securities and Exchange Commission and there were no objections from the creditors. The Company therefore registered the change of its capital with the Ministry of Commerce on 30 June 2005.

21. SHARE PREMIUM (DISCOUNT)

On 16 November 2005, the Office of the Securities and Exchange Commission issued an announcement providing guidelines on how to record the offset of a share capital reduction against a retained deficit, with reference to the opinion expressed by the Federation of Accounting Professions (“FAP”) in a letter dated 10 November 2005, in respect of recording the offset of premiums or reserves against deficits in retained earnings while there is still share discount outstanding in shareholders’ equity. It opined that companies must apply the share premium arising as a result of a capital reduction to eliminate the outstanding share discount first, with any remaining premium then able to be used to offset the deficit; and that any companies whose accounting does not accord with such principle should take corrective action, implementing the changes with immediate effect.

However, on 26 January 2006, the FAP issued a letter relaxing the enforcement of this accounting method, whereby companies are allowed to reduce share capital to eliminate any share discount. The Company chose to reduce its share capital and transfer the resulting share premium to eliminate the share discount. As at 31 December 2005, the outstanding balance of the Company’s share discount, net of share premium, was Baht 1,010 million.

In this respect, as described in Note 20 to financial statements, the Company's Annual General Meeting of the shareholders held on 20 April 2006 approved a share capital reduction of approximately Baht 1,992 million and the transfer of the share premium generated from the capital reduction to offset all of the outstanding share discount. The Company registered the capital reduction with the Ministry of Commerce on 7 August 2006 and transferred the share premium to offset the remaining share discount. As at 31 December 2006, the Company's outstanding share premium was approximately Baht 982 million.

22. ESOP WARRANTS

The Board of Directors' meeting held on 24 February 2006 approved the issuance of up to 99,236,870 warrants to the Company's directors and employees free of charge. The exercise ratio is to be 1 warrant per 1 ordinary share and the warrants are to be exercisable every 6 months, with a term of no more than 4 years from the first offering date. The ESOP Committee was granted authority to determine the exercise date and exercise price, which is not to be below the par value of the shares.

However, the Board of Directors' meeting held on 20 April 2006 approved the postponement of the issuance of the ESOP warrants in order to review the allocation of warrants, because there had been changes to the Board of Directors. Any issuance of the warrants is subject to approval by a meeting of the shareholders.

As at 31 December 2006, the Company have not issued the above ESOP warrants.

23. STATUTORY RESERVE

Pursuant to Section 116 of the Public Limited Companies Act B.E. 2535, the Company is required to set aside to a statutory reserve at least 5 percent of its net income after deducting accumulated deficit brought forward (if any), until the reserve reaches 10 percent of the registered capital. The statutory reserve is not available for dividend distribution.

As at 31 December 2006, the Company had set aside the statutory reserve of Baht 9,500,000 from its net income for the year 2006.

32. COMMITMENTS AND CONTINGENT LIABILITIES

32.1 Significant contingent liabilities as at 31 December 2006 are as follows :-

- 1) As at 31 December 2006, the Company had a commitment to purchase shares in a subsidiary company for approximately Baht 104 million. In December 1997, that subsidiary company was ordered closed and the Central Bankruptcy Court issued a final receiving order against its property on 29 May 2001. The Company has not set up any provision for loss as a result of the case since its legal counsel is of the opinion that the contract was of a reciprocal nature, stipulating conditions to be fulfilled and the counterparty had not fulfilled these conditions. The Company's management, therefore, believes that no loss will arise as a result of this matter.

- 2) In January 2002, the Company received a letter from the legal advisor of a company which is the counterparty to an agreement with the Company. Such company granted the Company the right to receive information relating to investment in the Stock Exchange of Thailand for customers. The letter called for penalty charge of Baht 5 million for the breach of the copyright of the above information system and asked the Company to stop such breach. Up to present, the negotiations with the counterparty have yet to reach a conclusion and it is anticipated that the legal proceedings may need to be undertaken. The Company is therefore unable to estimate its contingent liability and has therefore not yet recorded any liability in the accounts.
- 3) As at 31 December 2000, the Company has a contingent liability in respect of its guarantee on the revenue for the year ended 31 December 2000 of a business sold out to a third party during the year 2000, whereby if that business was unable to generate income of at least USD 0.3 million, the Company would have to compensate for the shortfall. In December 2001, the Company received notice to pay compensation for a shortfall amounting to approximately Baht 2 million. The compensation has been accounted for as a liability in the financial statements for the year 2001. Negotiations with the counterparty have yet to reach a conclusion.

32.2 Significant commitments as at 31 December 2006 are as follows :-

- 1) The Company and its subsidiaries have the significant outstanding commitments under long-term office space, office equipment and motor vehicles rental and services agreements. Future rental payable under these leases as at 31 December 2006 are as follows :-

(Unit : Million Baht)			
Year	The Company	The Subsidiaries	Total
2007	56.2	9.8	66.0
2008 – 2010	31.1	0.5	31.6
2011 – 2016	0.7	-	0.7

- 2) The Company has an obligation in respect of an agreement related to maintenance of computers and provision of related services, under which the Company is to pay a monthly fee of approximately Baht 2.7 million. No due date is stipulated in the agreement.
- 3) The Company is required to pay a membership fee to the Stock Exchange of Thailand comprising a monthly payment of Baht 50,000 and at a rate of 0.005 percent of the trading volume.
- 4) The Company is required to pay contributions to the Compensation Fund for Clearing and Settlement, which is overseen by the Thailand Securities Depository Company Limited (TSD), on a monthly basis, at a rate of 0.008 percent, 0.012 percent or 0.016 percent of its net settlements each month, depend on settlement risk of the Company.
- 5) The Company is required to pay contributions to the Securities Investor Protection Fund, which is overseen by the Stock Exchange of Thailand, on a monthly basis, at a rate of 0.0005 percent of the trading volume.
- 6) The Company has an obligation to pay a service fee under an on-line trading service agreement to Settrade.com, which is overseen by the Stock Exchange of Thailand, at a rate of 0.02 - 0.05 percent of its trading volume, with the minimum payment not less than Baht 20,000 per month.
- 7) The Company is required to pay execution fee to the Thailand Future Exchange, at the rate of Baht 35 per contract and clearing fee to the Thailand Clearing House, at the rate of Baht 15 per contract for buying or selling derivatives.
- 8) The Company is required to pay contributions to the Clearing Fund, which is overseen by the Thailand Clearing House Company Limited, on a monthly basis, at the minimum rate of Baht 1,000. The Thailand Clearing House may change the monthly contribution rate and may request more fund, depend on settlement risk of the Company.
- 9) The Company has an obligation to pay service fee upon an on-line derivative trading agreement to Settrade.com, which is overseen by the Stock Exchange of Thailand, at the rate of Baht 50 - 90 per contract for buying or selling derivative. The minimum fee is set to be Baht 40,000 per month.

10) The Company has the following commitments in respect of derivative contracts:-

- Derivatives on the Thailand Futures Exchange (TFEX)

As at 31 December 2006, the Company has commitments in respect of SET50 Index Futures contracts traded through the Thailand Futures Exchange for 1,005 contracts as detailed below.

Future contracts of June 2007	20
Future contracts of September 2007	2
Total Future contracts	<u><u>1,005</u></u>

As at 31 December 2006, the SET50 index stood at 473.27 and the contract multiplier was Baht 1,000 per index point.

- Over-the-Counter derivatives (DTC)

As at 31 December 2006, the Company has commitments in respect of Over-the-Counter derivative contracts as follows:-

Short Position

- A put option contract under which the option is a European-style option linked to the price of a listed company with theoretical values as of 31 December 2006 totaling Baht 0.26 million.
- Three call option contracts under which the option is a European-style binary (or digital) option linked to the SET50 index with theoretical values as of 31 December 2006 totaling Baht 1.08 million.
- Three call option contracts under which the options are European-style Asian options linked to the SET50 index with theoretical values as of 31 December 2006 totaling Baht 1.63 million.

Long Position

- Two put option contracts embedded in bill of exchange whereby the payoff are predicated on underlying instrument. The face value of the bill of exchange as of the contract date were Baht 14.99 million.
- Ten Swap equity contracts with theoretical values as of 31 December 2006 totaling Baht 5.53 million.

33. FINANCIAL INFORMATION BY SEGMENT

The majority of the operations of the Company and its subsidiary companies involve the single business segment of securities related business, including mutual fund management, and are carried on in Thailand, Hong Kong and the British Virgin Islands. As a result, all revenues, operating profits and assets as reflected in these financial statements pertain to the aforementioned industry and geographic areas.

34. FINANCIAL INSTRUMENTS

A financial instrument is any contract that gives rise to both a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial instruments of the Company and its subsidiaries carried in the balance sheets include cash and cash equivalents, long-term deposits at financial institutions, investments, receivables from and payables to Clearing House, securities and derivatives business receivables and payables, borrowings and subordinated loans from a subsidiary company.

Financial risk management policy

The Company and its subsidiary companies are exposed to risks from changes in interest rates and currency exchange rates and risks from nonperformance of contractual obligations by counterparties. The Company uses derivatives, as and when it considers appropriate, to manage such risks. In addition, the Company has a policy to enter into contracts with creditworthy counterparties. Therefore, the Company does not expect any material financial losses to be arisen from that the counterparties will fail to discharge their obligations as stipulated in the financial instruments contracts.

The accounting policies of derivatives are disclosed in notes to financial statements re: significant accounting policies.

34.1 Interest Rate Risk

Interest rate risk is the risk that future fluctuations in market interest rates will affect the operating results and cash flows of the Company.

The exposure to interest rate risk of the Company and its subsidiary companies relate primarily to their cash at banks, long-term investments in debt securities and long-term borrowings which carry interest rate. However, because most of the financial assets and liabilities carry flotation interest rate which will fluctuated in line with the market interest rates or carry fixed interest rate which approximate the current market interest rate, the Company and its subsidiary companies do not use derivatives to manage their interest rate risk. The details of long-term loans are set out in Notes to the financial statements No. 19.

As at 31 December 2006 and 2005, the significant financial assets and liabilities classified by types of interest rate and, for the financial assets and liabilities carrying fixed interest rate, by the contractual reprising or maturity date (whichever is earlier) are as follows :-

34.2 Credit Risk

Credit risk refers to the risk that a counter party will default on its contractual obligations, resulting in a financial loss to the Company.

The Company is exposed to credit risk primarily with respect to securities and derivatives business receivables, loans, other accounts receivable. The Company's management controls such risk by establishing credit limits for customers and counter parties and analysing their financial position as an ongoing basis. As a result, the Company does not expect to incur material financial losses.

The Company is not exposed to concentrations of credit risk because it has a variety of customer base and large number of customers. The maximum exposure to credit risk is limited to the carrying amount of securities and derivatives business receivables, loans, other receivables as stated in the balance sheet.

34.5 Foreign exchange risk

Foreign currency risk is the risk that the value of a financial instrument will fluctuate because of changes in foreign exchange rates.

As of 31 December 2006, the Company has investments in subsidiary companies in foreign currency under equity method of USD 60 million (equivalent to Baht 2,508 million). However, the Company has obtained Thai Baht loans from those subsidiaries totalling approximately Baht 1,720 million. As at 31 December 2006, the Company has not entered into any forward exchange contracts to manage its foreign exchange risk.

34.6 Fair value

Fair value represents the amount for which an asset could be exchanged or a liability settled between knowledgeable, willing parties in an arm's length transaction. The Company and its subsidiary companies have estimated the fair value of financial instruments as follow :-

a) Financial assets

The method used for determining the fair value is dependent upon the characteristics of the financial instruments. The fair values of financial assets including cash and cash equivalents, long - term deposits at financial institutions and receivables from Clearing House are considered to approximate their respective carrying values since the financial instruments are predominantly subject to market interest rates. The fair values of financial instruments that have standard terms and conditions and are traded on an active and liquid market, such as investments in securities, are determined based on the quoted market price. In addition, the fair values of securities business receivables and derivative business receivables are determined based on their book value, less allowance for doubtful accounts.

b) Financial liabilities

Borrowings from financial institutions, securities sold under repurchased agreement, payables to Clearing House and securities business payables and derivative business payables are presented at their book value since they mature in the short-term.

As of 31 December 2006, there are no financial instruments of which the book values are materially different from fair value.

35. SUBSEQUENT EVENT

35.1 Approval of dividend payment of the Company

The Board of Directors' Meeting of the Company held on 27 February 2007 approved the payment of a dividend of Baht 0.07 per share, or the total of approximately Baht 139 million, in respect of the year 2006. The dividend will be paid in May 2007. However, the dividend payment is subject to approval by the Annual General Meeting of the Company's shareholders in April 2007.

35.2 Approval of dividend payment of the subsidiary
